

Syk (P342) polyclonal antibody

Catalog: AP0375

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Syk (spleen tyrosine kinase) is a 635 amino acid protein that contains one protein kinase domain and two SH2 domains. One of several members of the protein kinase superfamily, Syk functions as a positive effector of B cell antigen receptor (CD79)-stimulated responses, coupling CD79 with the movement of one calcium ion through one of two phospho-regulated pathways. Via its ability to influence CD79 activity and to control the movement of calcium through the cell, Syk plays an important role in a variety of cellular responses, including differentiation, phagocytosis, proliferation and B cell development. Syk expression is upregulated in T cell lymphoma, suggesting a possible role for Syk in tumorigenesis. Two isoforms of Syk, designated short and long, exist due to alternative splicing events.

Product:

1 mg/ml in Phosphate buffered saline (PBS) with 15 mM sodium azide, approx. pH 7.2.

Molecular Weight:

~ 72 kDa

Swiss-Prot:

P43405

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 98% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000

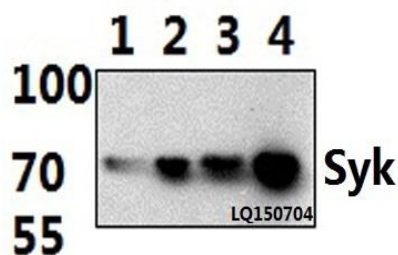

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Syk (P342) polyclonal antibody detects endogenous levels of Syk protein.

DATA:

Western blot (WB) analysis of Syk (P342) polyclonal antibody at 1:1000 dilution

Lane1:THP-1 whole cell lysate(30ug)

Lane2:Jurkat whole cell lysate(30ug)

Lane3:RAW264.7 whole cell lysate(30ug)

Lane4:PC12 whole cell lysate(30ug)
