

Occludin (A23) polyclonal antibody

Catalog: AP0765

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Occludin is an integral membrane protein closely associated with the tight junctions of epithelial and endothelial cells. Occludin is a tetraspan integral membrane protein in epithelial and endothelial tight junction (TJ) structures that can contain two extracellular loops. The protein exists in a variety of phosphorylated forms. Phosphorylation is involved in regulating both the localization and the function of occludin. Expression of occludin is up-regulated by polyunsaturated fatty acids, increasing transendothelial cell resistance and reducing cellular permeability to large molecules. The level of occludin varies greatly depending on tissue; in brain tissue, occludin is highly expressed at cell-cell contact sites.

Product:

1 mg/ml in Phosphate buffered saline (PBS) with 0.05% sodium azide, approx. pH 7.3.

Molecular Weight:

~ 59 kDa

Swiss-Prot:

Q16625

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Occludin (A23) polyclonal antibody detects endogenous levels of Occludin protein.

DATA:

Western blot (WB) analysis of Occludin (A23) polyclonal antibody at 1:1000 dilution

Lane1:Hela whole cell lysate(40ug)

Lane2:PC12 whole cell lysate(40ug)

Lane3:The Kidney tissue lysate of Mouse(30ug)

Lane4:The Kidney tissue lysate of Rat(30ug)

Note:

For research use only, not for use in diagnostic procedure.
