

## Rho G (Q132) polyclonal antibody

Catalog: BS3931

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

The Ras p21 family of guanine nucleotide proteins has been widely studied in view of its apparent role in signal transduction pathways and high frequency of mutations in human malignancies. It is now clear, however, that the Ras proteins (H-, K- and N-Ras p21) are members of a much larger superfamily of related proteins. Six members of this family, Rap 1A, Rap 1B, Rap 2, R-Ras, Ral A and Ral B, exhibit approximately 50% amino acid homology to Ras. The six mammalian Rho proteins (Rho A, B, C, G, 7 and 8) are approximately 30% homologous to Ras and are expressed in a wide range of cell types. Both Ras p21 and Rho p21, as well as other members of the Ras superfamily, contain a carboxy-terminal CAAX sequence (C, cysteine; A, aliphatic amino acid; X, any amino acid) which in the case of Ras has been shown to be essential for correct localization and function.

### Product:

1 mg/ml in Phosphate buffered saline (PBS) with 0.05% sodium azide, approx. pH 7.2.

### Molecular Weight:

~ 21 kDa

### Swiss-Prot:

P84095

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1:500~1:1000

IHC: 1:50~1:200

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

### Specificity:

Rho G (Q132) polyclonal antibody detects endogenous levels of Rho G protein.

### DATA:

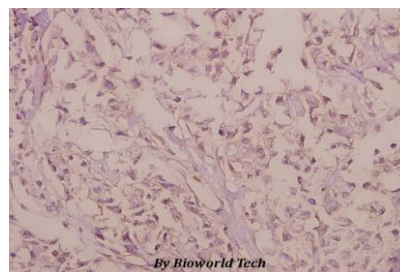

Western blot (WB) analysis of Rho G (Q132) pAb at 1:500 dilution

Lane1: The Spleen tissue lysate of Mouse(40ug)

Lane2: The Spleen tissue lysate of Rat(40ug)

Lane3: K562 whole cell lysate(40ug)

Lane4: H1792 whole cell lysate(40ug)

Immunohistochemistry (IHC) analyzes of Rho G (Q132) pAb in paraffin-embedded human colorectal carcinoma tissue at 1:50.

### Note:

For research use only, not for use in diagnostic procedure.
