

ADAM17 Rabbit monoclonal antibody

Catalog: BS40435

Host: Rabbit

Reactivity: Human Mouse Rat

BackGround:

TACE is responsible for the shedding of EGFR ligands such as amphiregulin and TNF- α . Some tumors have hyperactivated EGFR due to upregulated TNF- α production and upregulated TACE, making TACE a potential target for drug development. TACE activates Notch in a ligand-independent manner and has been shown to play a role in the development of the Drosophila nervous system.
