

## SR-2A polyclonal antibody

Catalog: BS60347

Host: Rabbit

Reactivity: Human, Mouse, Rat

### BackGround:

In platelets and gut, serotonin plays a major role in cardiovascular function and motility of the gastrointestinal tract, respectively. Serotonin mediates its effects through several of G protein coupled receptors, designated 5-HT receptors or alternatively SR receptors. The SR-2 receptors are comprised of three subtypes, SR-2A, SR-2B and SR-2C, which activate phospholipase C and release intracellular stores of calcium in response to serotonin. SR-2A has a specific role in tracheal smooth muscle contraction, bronchoconstriction and mediating aldosterone production, and it is also thought to play a role in several psychiatric disorders, including depression and schizophrenia. SR-2B is expressed in embryonic and adult cardiovascular tissues, gut and brain and plays an important role in the pathology of cardiac disorders. SR-2C is thought to mediate the effects of atypical antipsychotic drugs.

### Product:

1mg/ml in PBS with 0.1% Sodium Azide, 50% Glycerol.

### Molecular Weight:

~ 55 kDa

### Swiss-Prot:

P28223

### Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1:500~1:1000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

SR-2A polyclonal antibody detects endogenous levels of SR-2A protein.

### DATA:

Western blot (WB) analysis of SR-2A polyclonal antibody at 1:500 dilution

Lane1: HEK293T cell lysate

Lane2: Mouse brain tissue lysate

Lane3: H9C2 cell lysate

### Note:

For research use only, not for use in diagnostic procedure.
