CD3G polyclonal antibody

Catalog: BS60356 Host: Rabbit Reactivity: Human, Mouse, Rat

BackGround:

The T cell antigen receptor (TCR) recognizes for eign antigens and translates such recognition eventsinto intracellularsignalsthat elicit a change in the cell froma dormant to an activated state. Much of this signaling processcan be attributed to a multisubunit complex of proteins that associates directly with the TCR. This complex has been designated CD3 (cluster of differentiation 3). It iscomposed of five invariant polypeptide chainsthat associate to form three dimers: a heterodimer of γ and ε chains($\gamma \varepsilon$), a heterodimer of δ and ϵ chains($\delta\epsilon$) and a homodimer of two ζ chains($\zeta\zeta$) or a heterodimer of ζ and η chains($\zeta\eta$). The ζ and η chains are encoded by the same gene but differ in theircarboxyl-terminal ends due to an alternative splicing event. The γ , ϵ and δ chains each contain a single copy of a conserved immunoreceptor tyrosine-based activationmotif (ITAM). In contrast, the ζ chain containsthree consecutive copies of the same motif. Phosphorylated ITAMs act as docking sitesfor protein kinases such as ZAP-70 and Syk and are also capable of regulating theirkinase activity. The crystalstructure of ZAP-70's SH2 domains bound to the ζ chain ITAMs has been solved.

Product:

1 mg/ml in Phosphate buffered saline (PBS) with 0.05% sodium azide, approx. pH 7.2.

Molecular Weight:

~ 20 kDa

Swiss-Prot:

P09693

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000

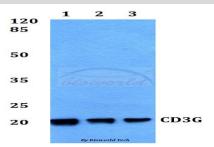

Storage&Stability:

Store at $4\,\mathrm{C}$ short term. Aliquot and store at -20 C long term. Avoid freeze-thaw cycles.

Specificity:

CD3G polyclonal antibody detects endogenous levels of CD3G protein.

DATA:

Western blot (WB) analysis of CD3G polyclonal antibody at 1:500 dilution

Lane1:HEK293T whole cell lysate

Lane2:Raw264.7 whole cell lysate

Lane3:H9C2 whole cell lysate

Note:

For research use only, not for use in diagnostic procedure.
