

ITGA8 polyclonal antibody

Catalog: BS60756

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Integrins are heterodimers composed of noncovalently associated transmembrane α and β subunits. In addition to mediating cell adhesion and cytoskeletal organization, integrins function as signaling receptors. Signals transduced by integrins play a role in many biological processes, including cell growth, differentiation, migration and apoptosis. Integrin $\alpha 8$ is expressed in contractile interstitial cells and smooth muscle cells and is upregulated in lung injury. Integrin $\alpha 8$ is also a marker for smooth muscle cells, expressed as early as alpha smooth muscle actin. The Integrin $\alpha 8$ chain is expressed in the glomerulus exclusively by mesangial cells and may play an important role for maintaining tissue integrity in the glomerulus during glomerular injury.

Product:

1 mg/ml in Phosphate buffered saline (PBS) with 15 mM sodium azide, approx. pH 7.2.

Molecular Weight:

~ 117 kDa

Swiss-Prot:

P53708

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

ITGA8 polyclonal antibody detects endogenous levels of ITGA8 protein.

DATA:

Western blot (WB) analysis of ITGA8 polyclonal antibody at 1:500 dilution

Lane1:Hela whole cell lysate

Lane2:Raw264.7 whole cell lysate

Lane3:PC12 whole cell lysate

Note:

For research use only, not for use in diagnostic procedure.
