

DROSHA polyclonal antibody

Catalog: BS61337

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

The ribonuclease III superfamily represents a structurally distinct group of double-strand-specific endonucleases with essential roles in RNA maturation, RNA decay, and gene silencing. Initial cleavage of microRNAs is catalysed by Drosha, a nuclease of the RNase III family, which acts on primary miRNA transcripts (pri-miRNAs) in the nucleus. Human Drosha is a component of two multi-protein complexes. The larger complex contains multiple classes of RNA-associated proteins including RNA helicases, proteins that bind double-stranded RNA, novel heterogeneous nuclear ribonucleoproteins and the Ewing's sarcoma family of proteins. The smaller complex is composed of Drosha and the double-stranded-RNA-binding protein, DGCR8.

Product:

1 mg/ml in Phosphate buffered saline (PBS) with 0.05% sodium azide, approx. pH 7.3.

Molecular Weight:

~ 159 kDa

Swiss-Prot:

Q9NRR4

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:1000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

DROSHA polyclonal antibody detects endogenous levels of DROSHA protein.

DATA:

Western blot (WB) analysis of DROSHA polyclonal antibody at 1:500 dilution

Lane1:HEPG2 whole cell lysate

Lane2:The Brian tissue lysate of Rat

Lane3:The Brian tissue lysate of Mouse

Note:

For research use only, not for use in diagnostic procedure.
