

Maspin polyclonal antibody

Catalog: BS6215

Host: Rabbit

Reactivity: Human, Mouse

BackGround:

Maspin is structurally a serine protease inhibitor (serpin) that was initially isolated from normal human mammary epithelial cells. Serpins are a family of proteins that inhibit chymotrypsin-like serine proteinases. Serpins control activated proteinases and several are involved in the regulation of cell death. Maspin is found in the extracellular matrix and at the plasma membrane. Maspin has been shown to act at the cell surface to block cell motility and inhibit invasion of breast and prostate cancer cells. Maspin is present in normal mammary epithelial cells but is absent in many tumor cell lines, yet no major structural alterations of the Maspin gene have been identified in tumor cells. Similarly, Maspin is expressed in normal prostate cells and downregulated or absent in prostate tumor cells..

Product:

1mg/ml in PBS with 0.1% Sodium Azide, 50% Glycerol.

Molecular Weight:

~ 42 kDa

Swiss-Prot:

P36952

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:2000

IHC: 1:50~1:200

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Maspin polyclonal antibody detects endogenous levels of Maspin protein.

DATA:

WesternBlot (WB) analysis of Maspin polyclonal antibody in extracts from HT-29 and NIH3T3 cells.

Immunohistochemistry (IHC) analysis of Maspin pAb in paraffin-embedded Human Colon tissue.

Note:

For research use only, not for use in diagnostic procedure.
