

Rabaptin 5 beta polyclonal antibody

Catalog: BS62450

Host: Rabbit

Reactivity: Human,Rat,Mouse

BackGround:

The Clustered Regularly Interspaced Short Palindromic Repeats (CRISPR) and CRISPR-associated protein (Cas9) system is an adaptive immune response defense mechanism used by archea and bacteria for the degradation of foreign genetic material. This mechanism can be repurposed for other functions, including genomic engineering for mammalian systems, such as gene knockout (KO) and gene activation. CRISPR Activation Plasmid products enable the identification and upregulation of specific genes by utilizing a D10A and N863A deactivated Cas9 (dCas9) nuclease fused to a VP64 activation domain, in conjunction with sgRNA (MS2), a target-specific sgRNA engineered to bind the MS2-P65-HSF1 fusion protein. This synergistic activation mediator (SAM) transcription activation system provides a robust system to maximize the activation of endogenous gene expression.

Product:

Rabbit IgG, 1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.4.

Molecular Weight:

~ 72 kDa

Swiss-Prot:

Q9H5N1

Purification&Purity:

The protein was purified from E.coli and the purity is > 95% (by SDS-PAGE).

Applications:

WB:1:500~1:1000 IHC:1:50~1:200

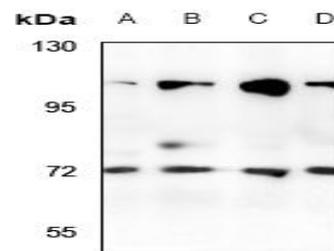

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -25 °C long term. Avoid freeze-thaw cycles.

Specificity:

Rabaptin 5 beta polyclonal antibody detects endogenous levels of Rabaptin 5 beta protein.

DATA:

Western blot (WB) analysis of Rabaptin 5 beta polyclonal antibody at 1:500 dilution

LaneA:BV2 whole cell lysate

LaneB:PC12 whole cell lysate

LaneC:A549 whole cell lysate

LaneD:LOVO whole cell lysate

Note:

For research use only, not for use in diagnostic procedure.
