

NCAPG2 polyclonal antibody

Catalog: BS65212

Host: Rabbit

Reactivity: Human

BackGround:

non-SMC condensin II complex subunit G2(NCAPG2) Homo sapiens This gene encodes a protein that belongs to the Condensin2nSMC family of proteins. The encoded protein is a regulatory subunit of the condensin II complex which, along with the condensin I complex, plays a role in chromosome assembly and segregation during mitosis. A similar protein in mouse is required for early development of the embryo. Alternate splicing results in multiple transcript variants. [provided by RefSeq, Aug 2013],
