

## RNF210 Polyclonal Antibody

Catalog: BS65432

Host: Rabbit

Reactivity: Human, Mouse, Rat, Pig, Horse,

### BackGround:

RFPL4A is a 287 amino acid protein. RFPL4A contains a cysteine-rich RING finger-like region (C3YC4), a coiled-coil motif, and B30.2 domains characteristic of the RING-B30 family of E3 ubiquitin-protein ligases, such as MID1. The RFPL4A gene maps to human chromosome 19q13.42. Chromosome 19 consists of approximately 63 million bases and makes up over 2% of human genomic DNA. Chromosome 19 includes a diversity of interesting genes and is recognized for having the greatest gene density of the human chromosomes. It is the genetic home for a number of immunoglobulin superfamily members including the killer cell and leukocyte Ig-like receptors, a number of ICAMs, the CEACAM and PSG families, and Fc $\gamma$  receptors. Key genes for eye color and hair color also map to chromosome 19. Peutz-Jeghers syndrome, spinocerebellar ataxia type 6, the stroke disorder CADASIL, hypercholesterolemia and insulin-dependent diabetes have been linked to chromosome 19.

### Product:

0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.

### Molecular Weight:

33 kD

### Swiss-Prot:

A6NLU0

### Purification&Purity:

affinity purified by Protein A

### Applications:

WB=1:500-2000

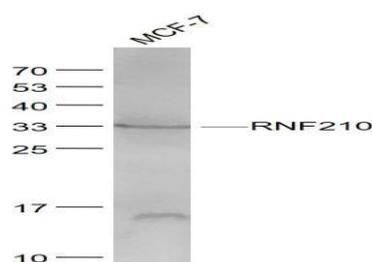

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

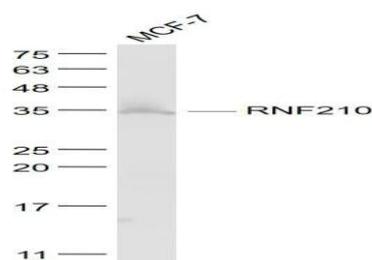

### Specificity:

RNF210 Polyclonal Antibody detects endogenous levels of RNF210 protein.

### DATA:

Primary: Anti- RNF210 at 1/1000 dilution

Primary: Anti- RNF210 at 1/1000 dilution

### Note:

For research use only, not for use in diagnostic procedure.
