

Repetin Polyclonal Antibody

Catalog: BS65450

Host: Rabbit

Reactivity: Human, Mouse, Rat, Pig, Cow, Horse,

Background:

Repetin is a 784 amino acid secreted protein that belongs to the S100-fused protein family. Repetin is an extracellular epidermal matrix protein that is expressed in the epidermis and at high levels in eccrine sweat glands, the inner sheaths of hair roots and the filiform papilli of the tongue. A multifunctional epidermal matrix protein, repetin is involved in the cornified cell envelope formation. Containing two EF-hand domains, repetin's recombinant N-terminal domain binds calcium reversibly. Repetin and trichohyalin may compensate for absent loricrin. The repetin gene contains three exons, two introns and spans at least 5.6 kb. The repetin gene is conserved in cow, mouse and rat, and maps to human chromosome 1q21.3.

Product:

0.01M TBS(pH7.4) with 1% BSA, 0.03% Proclin300 and 50% Glycerol.

Molecular Weight:

91 kD

Swiss-Prot:

Q6XPR3

Purification&Purity:

affinity purified by Protein A

Applications:

WB=1:500-2000

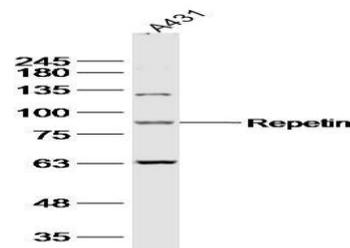

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

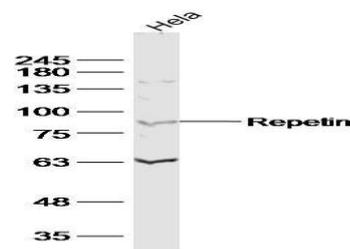

Specificity:

Repetin Polyclonal Antibody detects endogenous levels of Repetin protein.

DATA:

Primary: Anti- repetin at 1/300 dilution

Primary: Anti- repetin at 1/300 dilution

Note:

For research use only, not for use in diagnostic procedure.
