

Caspase-6 p18 (D179) polyclonal antibody

Catalog: BS7005

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Caspase-6 (Mch2) is one of the major executioner caspases functioning in cellular apoptotic processes. Upon apoptotic stimulation, initiator caspases such as caspase-9 are cleaved and activated. The activated upstream caspases further process downstream executioner caspases, such as caspase-3 and caspase-6, by cleaving them into large and small subunits, thereby initiating a caspase cascade leading to apoptosis. One of the major targets for caspase-6 is the membrane associated protein lamin A. The cleavage of this protein causes cell membrane malfunction, membrane blebbing and eventual cell death.

Product:

1mg/ml in PBS with 0.1% Sodium Azide, 50% Glycerol.

Molecular Weight:

~ 18 kDa

Swiss-Prot:

P55212

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

IHC: 1:50~1:200

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Specificity:

Caspase-6 p18 (D179) polyclonal antibody detects endogenous levels of the large subunit of active caspase-6 resulting from cleavage at Asp179 in human or Asp162 in mouse and rat (18 kDa).

DATA:

Immunohistochemistry (IHC) analyzes of Caspase-6 p18 (D179) pAb in paraffin-embedded human breast carcinoma tissue at 1:100.

Note:

For research use only, not for use in diagnostic procedure.
