

ORC6 polyclonal antibody

Catalog: BS71021

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

The origin recognition complex (ORC) is a highly conserved six subunit protein complex essential for the initiation of the DNA replication in eukaryotic cells. Studies in yeast demonstrated that ORC binds specifically to origins of replication and serves as a platform for the assembly of additional initiation factors such as Cdc6 and Mcm proteins. The protein encoded by this gene is a subunit of the ORC complex. Gene silencing studies with small interfering RNA demonstrated that this protein plays an essential role in coordinating chromosome replication and segregation with cytokinesis.

Product:

1mg/ml in PBS with 0.02% sodium azide, 50% glycerol, pH7.3.

Molecular Weight:

~ 28 kDa

Swiss-Prot:

Q9Y5N6

Purification&Purity:

The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1:500~1:2000

IF: 1:50~1:200

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

Specificity:

ORC6 polyclonal antibody detects endogenous levels of ORC6 protein.

DATA:

Western blot analysis of extracts of various cells, using ORC6 antibody.

Immunofluorescence analysis of A549 cell using ORC6 antibody. Blue: DAPI for nuclear staining.

Note:

For research use only, not for use in diagnostic procedure.
