

**IFIT1 polyclonal antibody**

Catalog: BS79115

Host: Rabbit

Reactivity: Mouse, Rat

**BackGround:**

This gene encodes a protein containing tetratricopeptide repeats that was originally identified as induced upon treatment with interferon. The encoded protein may inhibit viral replication and translational initiation. This gene is located in a cluster on chromosome 10 with five other closely related genes. There is a pseudogene for this gene on chromosome 13. Alternatively spliced transcript variants encoding multiple isoforms have been observed.
