

PPFIA3 polyclonal antibody

Catalog: BS79145

Host: Rabbit

Reactivity: Human

BackGround:

The protein encoded by this gene is a member of the LAR protein-tyrosine phosphatase-interacting protein (liprin) family. Liprins interact with members of LAR family of transmembrane protein tyrosine phosphatases, which are known to be important for axon guidance and mammary gland development. Liprin family protein has been shown to localize phosphatase LAR to cell focal adhesions and may be involved in the molecular organization of pre-synaptic active zones.
