

SARS-CoV-2 N Protein polyclonal antibody

Catalog: BS80271

Host: Rabbit

Reactivity: SARS-CoV-2

BackGround:

Packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. Plays an important role in enhancing the efficiency of subgenomic viral RNA transcription as well as viral replication. May modulate transforming growth factor-beta signaling by binding host SMAD3.
