

Integrin Linked ILK polyclonal antibody

Catalog: BZ16682

Host: Rabbit

Reactivity: Human, Mouse, Rat

BackGround:

Integrin-linked kinases (ILKs) couple integrins and growth factors to downstream pathways involved in cell survival, cell cycle control, cell-cell adhesion and cell motility. ILK functions as a scaffold bridging the extra-cellular matrix (ECM) and growth factor receptors to the actin cytoskeleton through interactions with integrin, PINCH (which links ILK to the RTKs via Nck2), CH-ILKBP and affixin.
