

## TBK1 monoclonal antibody

Catalog: MB10364

Host: Rabbit

Reactivity: Human, Mouse, Rat, Hamster

### BackGround:

The NF-kappa-B (NFKB) complex of proteins is inhibited by I-kappa-B (IKB) proteins, which inactivate NFKB by trapping it in the cytoplasm. Phosphorylation of serine residues on the IKB proteins by IKB kinases marks them for destruction via the ubiquitination pathway, thereby allowing activation and nuclear translocation of the NFKB complex.
