

## CD147 monoclonal antibody

Catalog: MB65752

Host: Mouse

Reactivity: Human

### BackGround:

Basigin (EMMPRIN, CD147) is a type I integral membrane receptor protein belonging to the immunoglobulin superfamily. Basigin is a glycosylated protein with four known isoforms, of which isoform 2 is the most abundantly expressed. Multiple functions have been ascribed to Basigin; foremost among these is stimulating the secretion of extracellular matrix metalloproteinases by adjacent fibroblasts, a function which has been implicated in promoting tumor progression. Research studies have shown that Basigin is overexpressed by many tumor cells, and its expression level may correlate with tumor malignancy. A recent study identified the BASIGIN gene as a regulatory target of Slug, suggesting a role for Basigin in the process of epithelial-mesenchymal transition. Basigin has also been identified as a marker for a subset of highly suppressive regulatory T cells, and as an obligate receptor for the malarial parasite *Plasmodium falciparum* on human erythrocytes.

### Product:

Mouse IgG1. Liquid in PBS, pH 7.3, and 0.02% sodium azide.

### Molecular Weight:

~ 42 kDa

### Swiss-Prot:

P35613

### Purification&Purity:

The monoclonal antibody was affinity-purified from mouse antiserum by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

IF (1/50 - 1/200)

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Specificity:

Recognizes human CD147

### DATA:

Flow cytometric analysis of human peripheral blood lymphocytes using Anti-CD147 Antibody, followed by anti-mouse IgG PE.

### Note:

For research use only, not for use in diagnostic procedure.
