

**APC mouse anti-human CD28 monoclonal antibody**

Catalog: MB8503A

Host: Mouse

Reactivity: Human

BackGround:

CD28 is one of the proteins expressed on T cells that provide co-stimulatory signals required for T cell activation and survival. T cell stimulation through CD28 in addition to the T-cell receptor (TCR) can provide a potent signal for the production of various interleukins (IL-6 in particular).

CD28 is the receptor for CD80 (B7.1) and CD86 (B7.2) proteins. When activated by Toll-like receptor ligands, the CD80 expression is upregulated in antigen presenting cells (APCs). The CD86 expression on antigen presenting cells is constitutive (expression is independent of environmental factors). CD28 is the only B7 receptor constitutively expressed on naive T cells. Association of the TCR of a naive T cell with MHC:antigen complex without CD28:B7 interaction results in a T cell that is anergic.

Product:

Mouse IgG1, PBS(pH7.2), 0.09% sodium azide.

Molecular Weight:

N/A

Swiss-Prot:

P10747

Purification&Purity:

Protein A affinity purified

Applications:

FC: 5ul per test

Storage&Stability:

Store at 4 °C . Avoid freeze.

Specificity:

This antibody detects Extracellular domain of human CD28.

DATA:

Flow cytometry analysis of human monocytes.

Note:

For research use only, not for use in diagnostic procedure.
