

GTF2B monoclonal antibody

Catalog: MB21277

Host: Mouse

Reactivity: Human, Monkey

BackGround:

This gene encodes the general transcription factor IIB, one of the ubiquitous factors required for transcription initiation by RNA polymerase II. The protein localizes to the nucleus where it forms a complex (the DAB complex) with transcription factors IID and IIA. Transcription factor IIB serves as a bridge between IID, the factor which initially recognizes the promoter sequence, and RNA polymerase II.

Product:

Purified antibody in PBS with 0.05% sodium azide.
