

## STK11 monoclonal antibody

Catalog: MB21407

Host: Mouse

Reactivity: Human, Mouse, Monkey

### BackGround:

Essential role in G1 cell cycle arrest. Phosphorylates and activates members of the AMPK-related subfamily of protein kinases. Tumor suppressor. serine/threonine kinase 11, with two alternatively spliced isoforms, expressed in all tissues, strongly homolog of *Xenopus* early embryonic kinase 1 (XEEK1), tumor suppressor gene in hamartomas syndrome and in left sided colon carcinogenesis, mutated in sporadic testicular cancer, malignant melanomas and laryngeal tumors, playing a minor role in the development of ovarian carcinoma. LKB1 is a potential target for atherosclerosis and cancer and is shown to be mutated in patients with Peutz-Jeghers cancer syndrome. Tissue specificity: Ubiquitously expressed. Strongest expression in testis and fetal liver.

### Product:

Ascitic fluid containing 0.03% sodium azide.

### Molecular Weight:

54kDa

### Swiss-Prot:

Q15831

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB: 1/500 - 1/2000    FC: 1/200 - 1/400

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG1

### DATA:

Western blot analysis using STK11 mouse mAb against NIH/3T3 (1), Raw246.7 (2), COS7 (3), Jurkat (4), HEK293 (5) and A431 (6) cell lysate.

Flow cytometric analysis of K562 cells using STK11 mouse mAb (green) and negative control (purple).

### Note:

For research use only, not for use in diagnostic procedure.
