

GATA6 monoclonal antibody

Catalog: MB21696

Host: Mouse

Reactivity: Human

BackGround:

This gene is a member of a small family of zinc finger transcription factors that play an important role in the regulation of cellular differentiation and organogenesis during vertebrate development. This gene is expressed during early embryogenesis and localizes to endo- and mesodermally derived cells during later embryogenesis and thereby plays an important role in gut, lung, and heart development. Mutations in this gene are associated with several congenital defects.

Product:

Purified antibody in PBS with 0.05% sodium azide

Molecular Weight:

60kDa

Swiss-Prot:

Q92908

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

FC:1/200 - 1/400

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG1

DATA:

Flow cytometric analysis of HEK293 cells using GATA6 mouse mAb (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
