

CTNNBL1 monoclonal antibody

Catalog: MB21881

Host: Mouse

Reactivity: Human

BackGround:

The protein encoded by this gene is a component of the pre-mRNA-processing factor 19-cell division cycle 5-like (PRP19-CDC5L) protein complex, which activates pre-mRNA splicing and is an integral part of the spliceosome. The encoded protein is also a nuclear localization sequence binding protein, and binds to activation-induced deaminase and is important for antibody diversification. This gene may also be associated with the development of obesity. Alternative splicing results in multiple transcript variants. A pseudogene of this gene has been defined on the X chromosome.

Product:

Purified antibody in PBS with 0.05% sodium azide.

Molecular Weight:

65.2kDa

Swiss-Prot:

Q8WYA6

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

FC:1/200 - 1/400

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG2a

DATA:

Flow cytometric analysis of HeLa cells using CTNNBL1 mouse mAb (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
