

ERBB4 monoclonal antibody

Catalog: MB21925

Host: Mouse

Reactivity: Human

BackGround:

This gene is a member of the Tyr protein kinase family and the epidermal growth factor receptor subfamily. It encodes a single-pass type I membrane protein with multiple cysteine rich domains, a transmembrane domain, a tyrosine kinase domain, a phosphatidylinositol-3 kinase binding site and a PDZ domain binding motif. The protein binds to and is activated by neuregulins and other factors and induces a variety of cellular responses including mitogenesis and differentiation. Multiple proteolytic events allow for the release of a cytoplasmic fragment and an extracellular fragment. Mutations in this gene have been associated with cancer. Alternatively spliced variants which encode different protein isoforms have been described; however, not all variants have been fully characterized.

Product:

Purified antibody in PBS with 0.05% sodium azide

Molecular Weight:

146.8kDa

Swiss-Prot:

Q15303

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

IHC:1/200 - 1/1000 FC:1/200 - 1/400

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG1

DATA:

Immunohistochemical analysis of paraffin-embedded human cervical cancer tissues using ERBB4 mouse mAb with DAB staining.

Flow cytometric analysis of HeLa cells using ERBB4 mouse mAb (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
