

## TCF4 monoclonal antibody

Catalog: MB22287

Host: Mouse

Reactivity: Human

### BackGround:

This gene encodes transcription factor 4, a basic helix-loop-helix transcription factor. The encoded protein recognizes an Ephrussi-box ('E-box') binding site ('CANNTG') - a motif first identified in immunoglobulin enhancers. This gene is broadly expressed, and may play an important role in nervous system development. Defects in this gene are a cause of Pitt-Hopkins syndrome. In addition, an intronic CTG repeat normally numbering 10-37 repeat units can expand to >50 repeat units and cause Fuchs endothelial corneal dystrophy. Multiple alternatively spliced transcript variants that encode different proteins have been described. <br />

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

71.3kDa

### Swiss-Prot:

P15884

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

FC:1/200 - 1/400

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG2b

### DATA:

Flow cytometric analysis of HeLa cells using TCF4 mouse mAb (green) and negative control (red).

### Note:

For research use only, not for use in diagnostic procedure.
