

## ADAMTS1 monoclonal antibody

Catalog: MB22289

Host: Mouse

Reactivity: Human

### BackGround:

This gene encodes a member of the ADAMTS (a disintegrin and metalloproteinase with thrombospondin motif) protein family. Members of the family share several distinct protein modules, including a propeptide region, a metalloproteinase domain, a disintegrin-like domain, and a thrombospondin type 1 (TS) motif. Individual members of this family differ in the number of C-terminal TS motifs, and some have unique C-terminal domains. The protein encoded by this gene contains two disintegrin loops and three C-terminal TS motifs and has anti-angiogenic activity. The expression of this gene may be associated with various inflammatory processes as well as development of cancer cachexia. This gene is likely to be necessary for normal growth, fertility, and organ morphology and function.

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

105.4kDa

### Swiss-Prot:

Q9UHI8

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB:1/500 - 1/2000    FC:1/200 - 1/400

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG1

### DATA:

Western blot analysis using ADAMTS1 mouse mAb against HeLa (1) cell lysate.

Flow cytometric analysis of HeLa cells using ADAMTS1 mouse mAb (green) and negative control (red).

### Note:

For research use only, not for use in diagnostic procedure.
