

## TFAP2B monoclonal antibody

Catalog: MB22347

Host: Mouse

Reactivity: Human

### Background:

This gene encodes a member of the AP-2 family of transcription factors. AP-2 proteins form homo- or hetero-dimers with other AP-2 family members and bind specific DNA sequences. They are thought to stimulate cell proliferation and suppress terminal differentiation of specific cell types during embryonic development. Specific AP-2 family members differ in their expression patterns and binding affinity for different promoters. This protein functions as both a transcriptional activator and repressor. Mutations in this gene result in autosomal dominant Char syndrome, suggesting that this gene functions in the differentiation of neural crest cell derivatives.

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

50.5kDa

### Swiss-Prot:

Q92481

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immuno-

gen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB:1/500 - 1/2000

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG2b

### DATA:

Western blot analysis using TFAP2B mouse mAb against SK-N-SH (1) cell lysate.

### Note:

For research use only, not for use in diagnostic procedure.
