

## PSMA monoclonal antibody

Catalog: MB22505

Host: Mouse

Reactivity: Human

### BackGround:

This gene encodes a type II transmembrane glycoprotein belonging to the M28 peptidase family. The protein acts as a glutamate carboxypeptidase on different alternative substrates, including the nutrient folate and the neuropeptide N-acetyl-L-aspartyl-L-glutamate and is expressed in a number of tissues such as prostate, central and peripheral nervous system and kidney. A mutation in this gene may be associated with impaired intestinal absorption of dietary folates, resulting in low blood folate levels and consequent hyperhomocysteinemia. Expression of this protein in the brain may be involved in a number of pathological conditions associated with glutamate excitotoxicity. In the prostate the protein is up-regulated in cancerous cells and is used as an effective diagnostic and prognostic indicator of prostate cancer. This gene likely arose from a duplication event of a nearby chromosomal region. Alternative splicing gives rise to multiple transcript variants encoding several different isoforms.

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

84.3kDa

### Swiss-Prot:

Q04609

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

WB:1/500 - 1/2000 FC:1/200 - 1/400

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG1

### DATA:

Western blot analysis using PSMA mouse mAb against HeLa (1), MCF-7 (2), HCT116 (3), and GC-7901 (4) cell lysate.

Flow cytometric analysis of HeLa cells using PSMA mouse mAb (green) and negative control (red).

### Note:

For research use only, not for use in diagnostic procedure.
