

## CD161 monoclonal antibody

Catalog: MB22522

Host: Mouse

Reactivity: Human

### BackGround:

Natural killer (NK) cells are lymphocytes that mediate cytotoxicity and secrete cytokines after immune stimulation. Several genes of the C-type lectin superfamily, including the rodent NKR1 family of glycoproteins, are expressed by NK cells and may be involved in the regulation of NK cell function. The KLRB1 protein contains an extracellular domain with several motifs characteristic of C-type lectins, a transmembrane domain, and a cytoplasmic domain. The KLRB1 protein is classified as a type II membrane protein because it has an external C terminus.

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

25.4kDa

### Swiss-Prot:

Q12918

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

FC:1/200 - 1/400

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG2b

### DATA:

Flow cytometric analysis of Raji cells using CD161 mouse mAb (green) and negative control (red).

### Note:

For research use only, not for use in diagnostic procedure.
