

LILRA3 monoclonal antibody

Catalog: MB22582

Host: Mouse

Reactivity: Human

BackGround:

This gene encodes a member of a family of immunoreceptors that are expressed predominantly in monocytes and B cells, and at lower levels in dendritic cells and natural killer cells. The encoded protein lacks the transmembrane region found in other members of this family. It acts as a soluble receptor for class I major histocompatibility complex (MHC) antigens. Alternatively spliced transcript variants encoding different isoforms have been found. This gene is located in a cluster of related genes on chromosome 19 and is polymorphic in human populations, with many individuals containing a deletion of this genomic region.

Product:

Purified antibody in PBS with 0.05% sodium azide

Molecular Weight:

47.5kDa

Swiss-Prot:

Q8N6C8

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

FC:1/200 - 1/400

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG1

DATA:

Flow cytometric analysis of K562 cells using LILRA3 mouse mAb (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
