

CD239 monoclonal antibody

Catalog: MB22705

Host: Mouse

Reactivity: Human

BackGround:

This gene encodes Lutheran blood group glycoprotein, a member of the immunoglobulin superfamily and a receptor for the extracellular matrix protein, laminin. The protein contains five extracellular immunoglobulin domains, a single transmembrane domain, and a short C-terminal cytoplasmic tail. This protein may play a role in epithelial cell cancer and in vaso-occlusion of red blood cells in sickle cell disease. Polymorphisms in this gene define some of the antigens in the Lutheran system and also the Auberger system. Inactivating variants of this gene result in the recessive Lutheran null phenotype, Lu(a-b-), of the Lutheran blood group. Two transcript variants encoding different isoforms have been found for this gene.

Product:

Purified antibody in PBS with 0.05% sodium azide

Molecular Weight:

67.4kDa

Swiss-Prot:

P50895

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

IHC:1/200 - 1/1000 FC:1/200 - 1/400

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long

term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG2a

DATA:

Immunohistochemical analysis of paraffin-embedded human ovarian cancer tissues using CD239 mouse mAb with DAB staining.

Flow cytometric analysis of MOLT4 cells using CD239 mouse mAb (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
