

WDFY3 monoclonal antibody

Catalog: MB22783

Host: Mouse

Reactivity: Human

BackGround:

This gene encodes a phosphatidylinositol 3-phosphate-binding protein that functions as a master conductor for aggregate clearance by autophagy. This protein shuttles from the nuclear membrane to colocalize with aggregated proteins, where it complexes with other autophagic components to achieve macroautophagy-mediated clearance of these aggregated proteins. However, it is not necessary for starvation-induced macroautophagy.

Product:

Purified antibody in PBS with 0.05% sodium azide
