

## CD171 monoclonal antibody

Catalog: MB22873

Host: Mouse

Reactivity: Human

### BackGround:

The protein encoded by this gene is an axonal glycoprotein belonging to the immunoglobulin supergene family. The ectodomain, consisting of several immunoglobulin-like domains and fibronectin-like repeats (type III), is linked via a single transmembrane sequence to a conserved cytoplasmic domain. This cell adhesion molecule plays an important role in nervous system development, including neuronal migration and differentiation. Mutations in the gene cause X-linked neurological syndromes known as CRASH (corpus callosum hypoplasia, retardation, aphasia, spastic paraplegia and hydrocephalus). Alternative splicing of this gene results in multiple transcript variants, some of which include an alternate exon that is considered to be specific to neurons.

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

140kDa

### Swiss-Prot:

P32004

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immuno-

gen and the purity is > 95% (by SDS-PAGE).

### Applications:

FC:1/200 - 1/400

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG1

### DATA:

Flow cytometric analysis of THP-1 cells using CD171 mouse mAb (green) and negative control (red).

### Note:

For research use only, not for use in diagnostic procedure.
