

GZMK monoclonal antibody

Catalog: MB23170

Host: Mouse

Reactivity: Human

BackGround:

This gene product is a member of a group of related serine proteases from the cytoplasmic granules of cytotoxic lymphocytes. Cytolytic T lymphocytes (CTL) and natural killer (NK) cells share the remarkable ability to recognize, bind, and lyse specific target cells. They are thought to protect their host by lysing cells bearing on their surface 'nonself' antigens, usually peptides or proteins resulting from infection by intracellular pathogens. The protein described here lacks consensus sequences for N-glycosylation present in other granzymes.

Product:

Purified antibody in PBS with 0.05% sodium azide

Molecular Weight:

29kDa

Swiss-Prot:

P49863

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

IHC:1/200 - 1/1000 FC:1/200 - 1/400

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG2b

DATA:

Immunohistochemical analysis of paraffin-embedded human tonsil tissues using GZMK mouse mAb with DAB staining.

Flow cytometric analysis of Jurkat cells using GZMK mouse mAb (green) and negative control (red).

Note:

For research use only, not for use in diagnostic procedure.
