

## CCRL2 monoclonal antibody

Catalog: MB23184

Host: Mouse

Reactivity: Human

### BackGround:

This gene encodes a chemokine receptor like protein, which is predicted to be a seven transmembrane protein and most closely related to CCR1. Chemokines and their receptors mediated signal transduction are critical for the recruitment of effector immune cells to the site of inflammation. This gene is expressed at high levels in primary neutrophils and primary monocytes, and is further upregulated on neutrophil activation and during monocyte to macrophage differentiation. The function of this gene is unknown. This gene is mapped to the region where the chemokine receptor gene cluster is located.

### Product:

Purified antibody in PBS with 0.05% sodium azide

### Molecular Weight:

39.5kDa

### Swiss-Prot:

O14618

### Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

### Applications:

FC:1/200 - 1/400

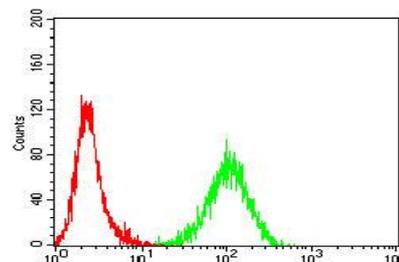

### Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

### Isotype:

Mouse IgG1

### DATA:

Flow cytometric analysis of Jurkat cells using CCRL2 mouse mAb (green) and negative control (red).

### Note:

For research use only, not for use in diagnostic procedure.
