

PAX3 monoclonal antibody

Catalog: MB23522

Host: Mouse

Reactivity: Human, Mouse

BackGround:

This gene is a member of the paired box (PAX) family of transcription factors. Members of the PAX family typically contain a paired box domain and a paired-type homeodomain. These genes play critical roles during fetal development. Mutations in paired box gene 3 are associated with Waardenburg syndrome, craniofacial-deafness-hand syndrome, and alveolar rhabdomyosarcoma. The translocation t(2;13)(q35;q14), which represents a fusion between PAX3 and the forkhead gene, is a frequent finding in alveolar rhabdomyosarcoma. Alternative splicing results in transcripts encoding isoforms with different C-termini.

Product:

Purified antibody in PBS with 0.05% sodium azide

Molecular Weight:

53kDa

Swiss-Prot:

P23760

Purification&Purity:

The antibody was affinity-purified from mouse ascites by affinity-chromatography using epitope-specific immunogen and the purity is > 95% (by SDS-PAGE).

Applications:

WB: 1/500 - 1/2000

Storage&Stability:

Store at 4 °C short term. Aliquot and store at -20 °C long term. Avoid freeze-thaw cycles.

Isotype:

Mouse IgG1

DATA:

Western blot analysis using PAX3 mouse mAb against Mouse brain (1), Rat spleen (2), Mouse liver (3) cell lysate.

Note:

For research use only, not for use in diagnostic procedure.
